

JACHTLAK HIGH GLOSS

page 1 of 2

DESCRIPTION

Jachtlak High Gloss is a high gloss one component varnish for interior and exterior use based on polyurethane modified alkyd resins.

PRINCIPAL CHARACTERISTICS

- Suitable for interior and exterior use;
- Varnish for wood such as doors, window frames, yachts, etc;
- Excellent levelling;
- Easy to apply by brush;
- Scratch resistant.

COLOURS AND GLOSS

Transparent - High gloss

BASIS PROPERTIES (AT 23°C AND 50% R.H.)

| Density | : | approx. 0,9 g/cm ³ |
|------------------------|---|--|
| Solid content | : | approx. 46 % (volume) |
| Recommended d.f.t. | : | 30 µm (dry), see additional information |
| Dust dry after | : | approx. 90 minutes |
| Full cure after | : | approx. 5 days, see additional information |
| Recoating interval | : | min. 8 hours, see additional information max. unlimited, provided gritpapered, clean and dry |
| Shelf life | : | separate components, stored cool an dry in original packaging, minimum 12 months |
| Flash point (DIN53213) | : | |

SPREADING RATE

At 30 μ m (d.f.t.) : 15,3 m²/l The practical spreading rate depends on a number of variables, such as: shape and size of object to be painted, the condition and profile of the substrate, the method of application, climatologic conditions and skill of labour.

SUBSTRATE CONDITION AND TEMPERATURE

| Wood, new | : | moisture content maximum 12%, clean and dry, free from any contamination and loose particles, sanded with grit paper P180. First coat should be diluted with 10% solvent, followed by two to three undiluted coats: |
|-------------------|---|---|
| Wood, maintenance | : | moisture content maximum 12%, clean and dry, free from any contamination and loose particles, sanded with grit paper P180. Touch up bare spots and finish with two to three full coats |

During application and curing a minimum temperature of 10 °C is allowed. The temperature of the substrate should be minimum 3 °C above dew point.

INSTRUCTIONS FOR USE

Before use, mix thoroughly.

Application with

| | Brush/roller | Air spray | Airless spray | | | |
|-----------------|--------------|--------------|---------------|--|--|--|
| Type thinner | White spirit | White spirit | n.a. | | | |
| % of thinner | 0 - 5 % | 10 - 15 % | | | | |
| Nozzle orifice | n.a. | 1.2 - 1.4 mm | | | | |
| Nozzle pressure | n.a. | 2 - 3 bar | | | | |
| Cleaning | White spirit | White spirit | | | | |

ADDITIONAL INFORMATION

• Recoating and curing of Jachtlak High Gloss

| | 15 °C | 20 °C | 25 °C |
|---|-----------|-----------|-----------|
| Minimum, with Jachtlak High Gloss or Jachtlak Semi Gloss | 24 hours | 8 hours | 8 hours |
| Maximum, with Jachtlak High Gloss or Jachtlak Semi GLoss, without sanding | 3 days | 2 days | 1 day |
| Maximum, after sanding with grit paper P180-P240 | unlimited | unlimited | unlimited |

• Recommended filmthickness

The recommended film thickness in this datasheet is for each separate layer and depends on application method. How many layers are recommended depends on the field of application, the exposure conditions and type of substrate. The total necessary number of layers can be found in the paint system recommendation.

- Semi-gloss finish
 For a semi-gloss finish for interiors please apply Jachtlak Semi Gloss as finishing coat.
- Recoating Jachtlak High Gloss It is not possible to recoat Jachtlak High Gloss with Double Coat Dubbel UV or Double Coat Karaat.

SAFETY INFORMATION

See the corresponding Material Safety Data Sheet for detailed instructions on safety, disposal and health.
